

B2000 Series Utility Suite

OKI
PRINTING SOLUTIONS

Unlock printing power and maintain business control

OKI Printing Solutions not only provides state of the art printers that are simple to operate, but also makes it easy for users to get the most out of them. The Utility Suite is a package of advanced software that comes with every printer and MFP, and is the key that can unlock extra printing power and business control.

The B2000 Series Utility Suite is OKI Printing Solutions' own unique set of software designed to help users get the most out of their B2200 and B2400 desktop mono printers.

Productivity Utilities – Get the most out of your printer

Template Manager 2006*

This powerful software program makes life easier in the office by providing ready-made templates for many kinds of stationery and promotional materials such as labels. The unique editing suite allows the freedom to create new templates for specific media or vertical industry specific documents and to make it even easier the software automatically matches the document with the correct media. These templates can also be shared across networks for design/brand consistency.

Ask OKI*

Ask OKI, help is close at hand delivering advice, hints and tips on how users can optimise the use of the B2200 and B2400. The Ask OKI tab in the printer driver connects users to a web site specifically tailored to the B2200 and B2400 printers. This gives simple, step by step instructions for optimal printing.

Status Monitor*

Status Monitor is a utility program that monitors your printer and gives you information about its current status. For example if the toner is low or the paper tray is empty, a pop-up message will appear on your PC screen. Status Monitor can be accessed from the printer driver.

Printer Management Utilities – Manage your printer over the network

PrintSuperVision*¹

This system allows IT support staff to monitor all business printers within the firewall, regardless of printer make. Access is given to networked printer data for monitoring, reporting and managing networked printers. The user interface to this system is web browser based, making it simple to use.

Network Extension*¹

Network Extension is used to view the printer configuration via the Properties tab in the printer driver and automatically configures the printer driver with the correct hardware options.

OKI LPR*

OKI LPR is a utility used to connect computers to the B2400n over a TCP/IP network. It includes many useful features that enable users to:

- Monitor the status of print jobs
- Download PS and PRN files directly to a printer
- View the printer status
- Automatically redirect jobs to other printers on the network

* Utility available with Microsoft Windows only

¹ B2400n version only
