

Unlock printing power and maintain business control

OKI Printing Solutions not only provides state of the art printers that are simple to operate, but also makes it easy for users to get the most out of them. The Utility Suite is a package of advanced software that comes with every printer and MFP, and is the key that can unlock extra printing power and business control.

The C5500 Series Utility Suite is OKI Printing Solutions' own unique set of software designed to help users get the most out of their C5550 MFP.

High Definition Color – Technology without equal. Printing without effort

It's easy to achieve outstanding results with High Definition Color – a unique collection of market defining hardware and software technologies. Together, these components deliver unsurpassed colour printing... simply, intelligently, perfectly. As the specialists in business printing solutions and leaders in colour printing, we can be trusted to deliver. Great colour starts with OKI Printing Solutions.

Productivity Utilities – Get the most out of your printer

Template Manager 2006*

This powerful software program makes life easier in the office by providing ready-made templates for many kinds of stationery and promotional materials such as labels, business cards, banners and CD/DVD labelling. The unique editing suite allows the freedom to create new templates for specific media or vertical industry specific documents and to make it even easier the software automatically matches the document with the correct media. These templates can also be shared across networks for design/brand consistency.

Storage Device Manager*

Storage Device Manager is a program used for managing files on the hard drive or flash memory of PCL/PostScript printers like the C5550 MFP. It is particularly useful for managing printer fonts and macros and can also be used to store print jobs and demo files directly on the printer e.g. brochures, forms or templates.

Nuance PaperPort**

Nuance PaperPort® software assists in the storing and organising of exact copies of scanned documents and photos on the computer. Scan, annotate and e-mail documents and photos in a format that everyone can view and print.

Nuance OmniPage**

Nuance OmniPage® software allows hard copies to be scanned and turned into editable text documents, such as Microsoft® Word, quickly, easily and accurately.

Cost Control Utilities - Manage your costs

Print Control***

Print Control is a job accounting and reporting program which enables network administrators to track printer usage and control costs. This easy to use utility captures details such as number of printouts, whether colour or mono, the paper type and size and the consumables used. Printer access can be restricted to authorized individuals or groups, and pre-defined cost limits can be set, denying further access once these print limits have been reached.

Printer Management Utilities - Manage your printer over the network

PrintSuperVision*

This system allows IT support staff to monitor all business printers within the firewall, regardless of printer make. Access is given to networked printer data for monitoring, reporting and managing networked printers. The user interface to this system is web browser based, making it simple to use.

Web Driver Installer*

Web Driver Installer allows network administrators to install a printer driver across a whole network in one go, making installation quick and easy. It is a server-based application that also detects new printers being connected to the network and sends an automatic e-mail prompt to users to download the new driver.

OKI LPR*

OKI LPR is a utility used to connect computers to the C5550 MFP over a TCP/IP network. It includes many useful features that enable users to:

- Monitor the status of print jobs
- Download PS and PRN files directly to a printer
- View the printer status
- Automatically redirect jobs to other printers on the network

Color Management Utilities - Control your colour output

Color Swatch

OKI Printing Solutions Color Swatch is used to emulate a specific printed colour. When using the C5550 MFP, businesses will benefit from precision colour printing particularly when printing corporate colours, such as those used for company logos.

Color Correct*

With the Office Palette Tuning function for the C5550 MFP you can adjust the standard palette colours in Microsoft Office programs. The Hue & Saturation Tuning function allows you to change the overall appearance of a print by adjusting gamma, hue and saturation.

Profile Assistant

Profile Assistant is software for managing ICC profiles stored on the printer hard disk. These ICC profiles can be used to perform tasks such as matching the colours of your monitor or simulating the output of other printer models.
