

Unlock printing power and maintain business control

OKI Printing Solutions not only provides state of the art printers that are simple to operate, but also makes it easy for users to get the most out of them. The Utility Suite is a package of advanced software that comes with every printer and MFP, and is the key that can unlock extra printing power and business control.

The C3450 Utility Suite is OKI Printing Solutions' own unique set of software designed to help users get the most out of their C3450 Series colour and mono printers.

High Definition Color – Technology without equal. Printing without effort

It's easy to achieve outstanding results with High Definition Color – a unique collection of market defining hardware and software technologies. Together, these components deliver unsurpassed colour printing... simply, intelligently, perfectly. As the specialists in business printing solutions and leaders in colour printing, we can be trusted to deliver. Great colour starts with OKI Printing Solutions.

Productivity Utilities – Get the most out of your printer

Template Manager*

This powerful software program makes life easier in the office by providing ready-made templates for many kinds of stationery and promotional materials such as labels and 1200mm banners. The unique editing suite allows the freedom to create new templates for specific media or vertical industry specific documents and to make it even easier the software automatically matches the document with the correct media. These templates can also be shared across networks for design/brand consistency.

Ask OKI

Ask OKI, help is close at hand delivering advice, hints and tips on how users can optimize the use of the C3450 colour and mono printer. The Ask OKI tab in the printer driver connects users to a web site specifically tailored to the C3450. This gives simple, step by step instructions for optimal printing.

Status Monitor*

Status Monitor is a utility program that monitors your printer and gives you information about its current status. For example if the toner is low or the paper tray is empty, a pop-up message will appear on your PC screen. Status Monitor can be accessed from the printer driver.

Photo Enhance**

Photo Enhance adjusts the tonal quality of images, making them appear brighter and more vibrant. This allows users to achieve clear, sharp, photo-like quality pictures even on ordinary office paper. This unique OKI Printing Solutions feature is selectable within the printer driver and will enable any business to enjoy truly professional in-house printing.

Colour Management Utilities – Finely control your colour output

Color Correct

With the Office Palette Tuning function for the C3450 you can adjust the standard palette colours in Microsoft Office programs. The Hue and Saturation Tuning function allows you to change the overall appearance of a print by adjusting gamma, hue and saturation.

Color Swatch

OKI Printing Solutions Color Swatch is used to emulate a specific printed colour. When using the C3450, businesses will benefit from precision colour printing particularly when printing corporate colours, such as those used for company logos.

Cost Control Utilities – Manage your costs

Print Control

Print Control is a job accounting and reporting program which enables network administrators to track printer usage and control costs. This easy to use utility captures details such as number of printouts, whether colour or mono, the paper type and size and the consumables used. Printer access can be restricted to authorized individuals or groups, and pre-defined cost limits can be set, denying further access once these print limits have been reached.

Printer Management Utilities – Manage your printer over the network

PrintSuperVision*

This system allows IT support staff to monitor all business printers within the firewall, regardless of printer make. Access is given to networked printer data for monitoring, reporting and managing networked printers. The user interface to this system is web browser based, making it simple to use.

OKI LPR*

OKI LPR is a utility used to connect computers to the C3450 over a TCP/IP network. It includes many useful features that enable users to:

- Monitor the status of print jobs
- Download PS and PRN files directly to a printer
- View the printer status
- Automatically redirect jobs to other printers on the network

*Utility available with Microsoft Windows only

**Not included in Windows/Mac PostScript drivers

Information subject to change without notice. All trademarks acknowledged.

AdminManager*

AdminManager is used for configuring and managing printer network card settings. It can assign IP addresses and configure settings for TCP/IP, Netware, Ethertalk, NetBEUI, E-mail and more, making it easy to manage OKI Printing Solutions network printers, such as the C3450n, from one place.
